Nissan North America Inc.

Manufacturer Service Campaign issued

- Campaign #PM674 NV200 TAXI ACU RPL NTB17-029
- Status: Remedy Available

Locate an authorized Nissan dealer near you to obtain more information about this campaign

🔗 **Learn more about this campaign**

Description: Nissan previously notified owners of proper vehicle usage to prevent a potential liquid intrusion issue on specific MY2013-2017 Nissan NV200 (M20) and MY2014-2017 NY Taxi (M30) vehicles. The Air bag Control Unit (ACU) is located under the center console. Liquids spilled on or around the center console area or power washing the floor may contact ACU connections at the ACU circuit board.

Liquid intrusion may lead to corrosion of the Air bag Control Unit (ACU), which may result in illumination of the air bag warning lamp and deactivation of front air bags.

Remedy: Nissan dealers received console tags to be placed in the center console tray for affected vehicles in dealer inventory. Nissan also sent owners of affected vehicles a letter informing them of proper vehicle usage to prevent the potential for damage from liquid intrusion. Dealers will now verify the air bag warning lamp is operating correctly and install foam to the center console. If the air bag warning light is not operating correctly, dealers will replace the Air bag Control Unit (ACU) in addition to installing the foam on the center console.

Nissan North America Inc.

Manufacturer Safety recall issued

- NHTSA #25V-676
- Recall #PMA56 NV200VAN FUEL PUMP NTB25-056
- Status: Remedy Available

Locate an authorized Nissan dealer near you to obtain more information about this recall

Description: THE FUEL TANK TEMPERATURE (FTT) SENSOR HARNESS INTERNAL TO THE FUEL PUMP IN AFFECTED VEHICLES MAY HAVE BEEN ROUTED INCORRECTLY, CAUSING CONTACT WITH THE FUEL PUMP CONNECTOR. OVER TIME, THIS CONTACT MAY WEAR AWAY THE PROTECTIVE COATING AND POTENTIALLY CAUSE AN ELECTRICAL SHORT, RESULTING IN A BLOWN FUEL PUMP FUSE.

A BLOWN FUEL PUMP FUSE CAN INTERRUPT FUEL DELIVERY TO THE ENGINE, POTENTIALLY CAUSING A LOSS OF MOTIVE POWER (LOMP), PREVENTING THE VEHICLE FROM RESTARTING AND INCREASING THE RISK OF A CRASH. IN SOME CASES, A MALFUNCTION INDICATOR LIGHT (MIL) MAY ILLUMINATE IN THE INSTRUMENT CLUSTER WHEN A VOLTAGE IRREGULARITY IS DETECTED BY THE FUEL TANK TEMPERATURE SENSOR BECAUSE OF THE SHORT CIRCUIT.

Remedy: Your Nissan dealer will inspect the Fuel Tank Temperature (FTT) sensor harness internal to the fuel pump assembly for the presence of abnormal wear and confirm if Diagnostic Trouble Code (DTC) is stored. If no abnormal wear is detected on the FTT sensor harness, your dealer will wrap the harness with protective tubing and reroute the harness to ensure there is no contact with the fuel pump connector. If specific wear is detected on the FTT sensor, your dealer will be instructed to replace the fuel level sender and FTT sensor harness.

Glossary

Accident Indicator

CARFAX receives information about accidents in all 50 states, the District of Columbia and Canada.

Not every accident is reported to CARFAX. As details about the accident become available, those additional details are added to the CARFAX Vehicle History Report. CARFAX recommends that you have this vehicle inspected by a qualified mechanic.

- According to the National Safety Council, Injury Facts, 2021 edition, 5% of the 276 million registered vehicles in the U.S. were involved in an accident in 2019. Over 77% of these were considered minor or moderate.
- This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 8/17/26 at 12:20:59 PM (CDT). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

Commercial

Vehicle was registered for business purposes.

Damage Indicator

Damage can be a result of many different types of events. Examples include contact with objects (other cars, trees, traffic signs, road debris, etc), vandalism, or weather-related events. Not every damage event is reported to CARFAX. As details about the damage event become available, those additional details are added to the CARFAX Vehicle History Report. CARFAX recommends that you have this vehicle inspected by a qualified mechanic.

- This CARFAX Vehicle History Report is based only on information supplied to CARFAX and available as of 8/17/26 at 12:20:59 PM (CDT). Other information about this vehicle, including problems, may not have been reported to CARFAX. Use this report as one important tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

Damage Severity

Damage events result in one of the following severity levels:

- Minor: Generally, minor damage is cosmetic (including dents or scratches), may only require reconditioning, and typically does not compromise a vehicle's operation and/or safety.
- Moderate: Moderate damage may affect multiple components of the vehicle and may impair the vehicle's operation and/or safety.
- Severe: Severe damage usually affects multiple components of the vehicle and is likely to compromise the vehicle's operation and/or safety.

CARFAX recommends getting a pre-purchase inspection at a certified collision repair facility.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Manufacturer Recall

Automobile manufacturers issue recall notices to inform vehicle owners of a safety defect or failure to meet minimum federal safety or emissions standards. Manufacturer recalls are repaired at no cost to the customer.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1991 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Service Campaign

Automobile manufacturers issue a service campaign to address product technical issues that may not be related to safety or emissions standards. These issues are typically customer satisfaction initiatives.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.
